

Gaëtan Piérard

Senior Account Executive

Cloud, SaaS & Infrastructure Solutions

Sales Experience & Technical Evolution

I've spent the last decade navigating complex B2B sales cycles at global companies. My career has been built on delivering results in demanding enterprise markets, not just by closing deals, but by managing deep relationships across large organizations. I've always enjoyed the challenge of taking a technical product and making it make sense for a C-level executive.

After more than ten years in high-pressure sales roles, I made the deliberate decision to take a step back and invest in strengthening my technical foundation. I'm now completing an intensive 9-month program at BeCode focused on infrastructure, networking, and security fundamentals, which enables me to engage more effectively with IT, architects, and security teams.

My goal is to move past the high-level pitch and gain a hands-on understanding of how modern IT environments are designed, operated, and maintained. By combining this technical grounding with my enterprise sales background, I can better understand customer challenges and bring deeper value throughout the sales process.

Work Experience

Workday

Aug 2023 – Oct 2024

Account Executive – SaaS

- Built a net-new Financial Management pipeline from 1 to 18 qualified opportunities within 12 months, focusing on mid-to-large enterprises (>500 employees).
- Specialized in financial transformation sales, engaging CFOs, CIOs, and enterprise architects to align Workday's platform with operational, integration, and compliance requirements.
- Led discovery workshops to uncover process gaps, data-flow constraints, and integration challenges — enabling more accurate scoping with solution architects.
- Drove multi-stakeholder cycles involving Finance, IT, Procurement, and Security teams, ensuring alignment across business and technical decision makers.
- Strengthened Workday's presence in the Belux region by targeting under-penetrated verticals and building long-term account strategies.

Oracle

June 2018 – Sept 2022

Cloud Applications – Sales Representative

- Managed the full sales cycle for ERP & SCM Cloud in large enterprises (>€650M revenue), often competing against SAP and Microsoft.
- Achieved 109% of annual target (FY21) by executing structured account plans and prioritizing high-value transformation initiatives.
- Worked closely with CIOs, enterprise architects, and integration teams to address infrastructure, security, and interoperability requirements during cloud migrations.
- Led competitive displacement strategies by mapping Oracle's cloud capabilities to customer pain points, legacy system limitations, and modernization roadmaps.
- Coordinated with presales, product specialists, and industry teams to deliver tailored value propositions for manufacturing, public sector, and financial services.

Unify (former Siemens Telecommunication)

Nov 2015 – June 2018

Channel Manager – Indirect Sales

- Managed and expanded a network of Value-Added Resellers (VARs) across Belgium, strengthening Unify's indirect sales footprint.
- Built joint go-to-market plans, enabling partners with sales tools, training, and competitive positioning.
- Supported partners in opportunity qualification, deal structuring, and customer presentations — accelerating time-to-revenue.
- Consistently achieved 85%–136% of annual targets, driven by strong partner relationships and structured territory coverage.
- Gained hands-on exposure to networking, unified communications, and infrastructure conversations, collaborating with technical teams during presales cycles.

Earlier Experience

Sept 2010 – Nov 2015

Deloitte (Outsourcing), Ordiges

- Held various roles in outsourcing, business operations, and client engagement.
- Developed strong foundations in customer service, process rigor, and stakeholder communication.
- Built early experience in problem solving, business analysis, and cross-team collaboration.
